

ADR deluxe

VERTICALLY OPENING SKYLIGHTS

for commercial applications

www.bassoskylights.com

ADVANTAGES

- the innovative vertical opening system provides free ventilation from all 4 sides, which equals larger surface aeration and better wind resistance.
- The lateral overhang of the cover allows the user to open the skylight even in the event of rain.
- The solid steel and aluminium structure was designed and developed by BASSO SKYLIGHTS, to ensure maximum strength.

THE NEW ADR-DELUXE SYSTEM.

ADR-DELUXE uses the latest technology to ensure esthetically pleasing lines and installation in various environments.

The ADR-DELUXE has a vertically lifted cover that is secured to retractable tracks which are hidden by the base of the skylight.

ADR-DELUXE provides excellent lighting and constant ventilation for various environments and also protects against excessive smoke, heat, moisture and odour.
